Rutherford County Regional Planning Commission

DATE: March 30, 2015
TO: Rutherford County Public Works Committee and Board of Commissioners
FROM: Rutherford County Regional Planning Commission
RE: Rutherford County Regional Planning Commission Activity Report

The Rutherford County Regional Planning Commission acted on the following request at its March 9, 2015 meeting:

- A. Paul Cook with C&M Cabinets (15-A005)
No Recommendation – Split Vote
Location: Sulphur Springs Road
Commissioner: Will Jordan
Size of Site: Approximately 6.0 acres
Tax Map: 48, Parcel: 57.04
Existing Zoning: Residential Medium-Density (RM)
Proposed Zoning: Light Industrial (LI)

- B. Thomas (Buddy) Ogles (15-A006)
Motion to Recommend APPROVAL (10 for, 0 against)
Location: 7151 Manchester Pike
Commissioner: Joe Frank Jernigan
Size of Site: Approximately 1.39 acres
Tax Map: 151, Parcel: 38.00
Existing Zoning: Residential Medium-Density (RM)
Proposed Zoning: Commercial Services (CS)

In addition, the following plats and site plans were approved at the March 23, 2015 meeting:

WR Thompson Final Plat (14-2067)	Site Details:	1 lot on 19.41 acres, zoned RM and CS
	Applicant:	WR Thompson
	Location:	West Jefferson Pike
Danny Patel Site Plan Amendments (15-3005)	Site Details:	Relocation of diesel fuel island
	Applicant:	Danny Patel
	Location:	Intersection of Crescent Lane/Shelbyville Pike

WR Thompson Site Plan for Mini-Warehouses (14-3023)	Site Details: Applicant: Location:	New construction of approximately 78,000 square feet of mini-warehouse/RV and boat storage space on 19.41 acres zoned CS and RM WR Thompson West Jefferson Pike
FJB Limited Partnership Shop Additions Site Plan (15-3004)	Site Details: Applicant: Location:	New construction of approximately 7,100 square feet on 11.08 acres, zoned CS FJB Limited Partnership 5630 Lebanon Pike
Capital Business Park, Lot 5B Site Plan (15-3005)	Site Details: Applicant: Location:	New construction of approximately 5,500 square feet of office and warehouse space on 2.00 acres zoned EAC Hire Construction Capital Way

Rutherford County Regional Planning Commission Staff Report

Board of Commissioners Meeting Date: April 16, 2015

Case Number: 15-A005

Staff Recommendation: **APPROVAL**

PC Recommendation **NO RECOMMENDATION (9 FOR, 1 AGAINST)**

Request by: Paul Cook, with C&M Cabinets

Property Address: Sulphur Springs Road

Commission District: 3 – Will Jordan

Urban Growth Boundary: Murfreesboro UGB

Applicant Request

Rezoning from Residential Medium-Density (RM) to Light Industrial (LI)

Purpose of District

This class of district is intended to provide space for a range of industrial and related uses that conform to a high level of performance standards and have the least objectionable characteristics. It is required that all operations of such establishments with the exception of limited outdoor storage be carried on within completely enclosed buildings thus providing a standard of development which removes most adverse characteristics that affect neighboring properties. These districts may provide a buffer between other districts and other industrial activities that have more objectionable influences. New residential activities except for those permitted as an accessory use are excluded, and community facilities and commercial establishments that provide needed services for industry and are complementary thereto are permitted.

Site Characteristics

Current Zoning: RM

Current Use: Vacant

Adjacent Uses: Existing cabinet business to the east. Single-family residential uses on all other sides

Adjacent Zoning: CS to the east. RM on all other sides.

Size of Tract: Approximately 6.0 acres

Comprehensive Plan

The Rutherford County Comprehensive Plan shows this location as being included within the Suburban Character Area. Suburban Character Areas are recommended to include residential uses at densities of up to three (3) units per acre and non-residential densities of .2 Floor/Area Ratio (FAR). Sulphur Springs Road is also labeled as a future Urban Arterial.

Proposal supported by Comprehensive Plan

Staff feels that the proposal is consistent with the policies listed in the Comprehensive Plan.

Infrastructure

Roads: The property is located along Sulphur Springs Road. The closest traffic count to the subject property is located approximately one and a half

miles to the east of the property that shows a 2013 count of 4,371 trips per day. Sulphur Springs Road is classified as an arterial road with a future 5-lane cross-section on the County's Long Range Transportation Plan (LRTP).

Utilities: According to Consolidated Utility District (CUD), there is a 12-inch water line to service the property (See attached map).

Fire Protection: According to information provided by CUD, there is a fire hydrant located just to the east of the subject property. Any development will be required to adhere to the adopted fire codes for Rutherford County.

Stormwater: Portions of the subject property are impacted by the 100-year floodplain, as delineated by the Federal Emergency Management Agency (FEMA). The applicant will need to work closely with Engineering staff to ensure that a stormwater management system is designed to provide water quality and quantity control for any new improvements.

Schools: Not Applicable since this application is not for residential uses.

Background/Proposal Details

Proposed Use: The subject property is located on the north side of Sulphur Springs Road, to the west of the interchange with State Route (S.R.) 840. The applicant would like to move his existing cabinet making business, located within the city limits of Murfreesboro, to this property. Cabinet Making and Similar Products are classified as Light Industrial Activities in the Zoning Ordinance, which requires Light Industrial zoning. There is an existing cabinet shop to the east of the subject property that was approved by the Board of Commissioners in August 2002. The existing shop is zoned Commercial Services (CS) and is considered a grandfathered use.

Access & Parking: The applicant has submitted a concept plan, which has been included with your agenda materials. Access is shown, along with approximately 10 spots. Staff does not expect a large amount of traffic to the site so any improvements to Sulphur Springs Road should be minimal. Sulphur Springs Road is classified as an arterial road with a future 5-lane cross-section on the County's LRTP, so dedication of right-of-way may be required as a condition of site plan approval.

Landscaping: The applicant's concept plan shows a Type 3 Buffer along the west and north property lines and a Type 1 Buffer on the east property line. A small portion of the east property line will also have to have a Type 3 Buffer. These buffers can be accomplished through the use of plantings and/or solid visual screens and plantings. Existing plantings can be counted towards this requirement.

Performance Standards: Section 1106 of the Zoning Ordinance creates performance standards for noise, dust, odor and hazardous materials that commercial or industrial activities must be able to meet.

Staff/Planning Commission Recommendation

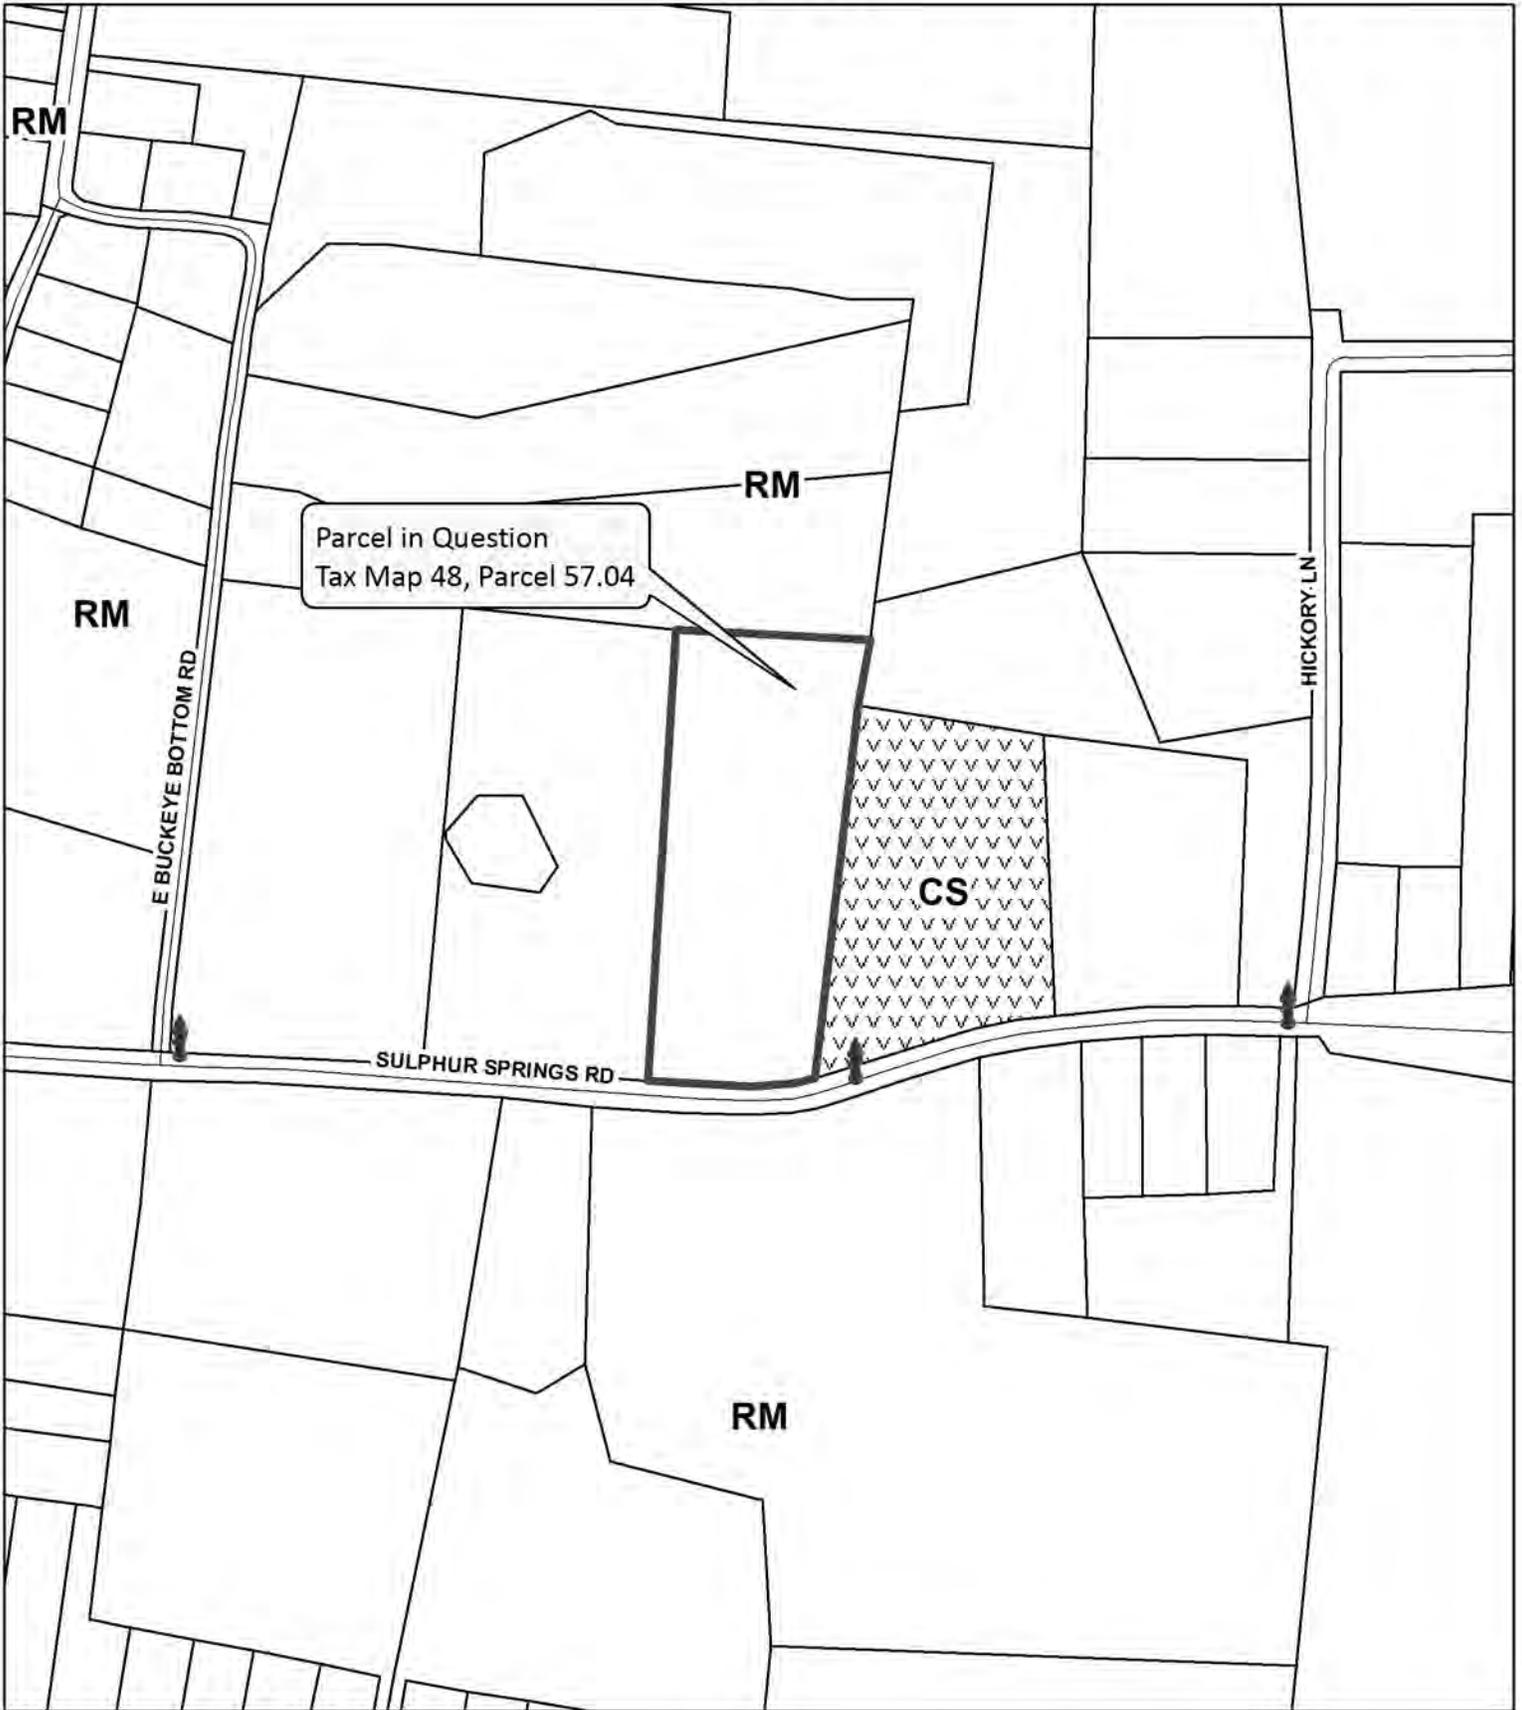

Although this area is not identified as a development node in the Comprehensive Plan, Staff does expect the area to develop commercially in the future due to the future widening of Sulphur Springs Road and the location of the S.R. 840 Interchange. This use would not be the first non-residential use in the area, as an existing cabinet shop is located immediately to the east. Staff recommends approval.

There was a significant amount of discussion on this item at the Planning Commission meeting. Some of the commissioners felt that the LI zoning opened up too many potential uses if the proposed cabinet shop were to vacate the property. Others felt that it was a logical extension of non-residential zoning considering there was an existing cabinet shop immediately to the east. Although there were two separate motions (one to deny and one to approve) the Planning Commission was not able to come to any consensus. Ultimately, the Planning Commission, upon advice from the County Attorney's Office, voted to send the matter to the Board of Commissioners without a recommendation.

Rutherford County Regional Planning Commission Staff Report

Board of Commissioners Meeting Date: April 16, 2015

Case Number: 15-A006

Staff Recommendation: **APPROVAL**

PC Recommendation: **APPROVAL (10 FOR, 0 AGAINST)**

Request by: Thomas (Buddy) Ogles

Property Address: 7151 Manchester Highway

Commission District: 6 – Joe Frank Jernigan

Urban Growth Boundary: Rural Area

Applicant Request

Rezoning from Residential Medium-Density (RM) to Commercial Services (CS)

Purpose of District

This class of district is designed to provide for a wide range of commercial uses concerned with retail trade and consumer services; amusement and entertainment establishments; automotive and vehicular service establishments; transient sleeping accommodations; eating and drinking places; financial institutions; and offices. However, it is not intended that this district permit uses which generate large volumes of truck traffic, and certain activities that have lower performance characteristics are prohibited. Less building bulk is permitted, and more open space and buffering are required.

Site Characteristics

Current Zoning: RM

Current Use: Existing single-family dwelling unit and various accessory structures, one of which contains the applicant's electrical contracting business. There is also an existing horse barn on the property

Adjacent Uses: Residential and agriculture. Existing mini-warehouse units located across East Gum Road

Adjacent Zoning: RM on all sides. CS located directly across East Gum Road

Size of Tract: Total size – 19.41 acres. Area for rezoning – 1.39 acres

Comprehensive Plan

The Rutherford County Comprehensive Plan shows this location as being included within the Suburban Character Area. Suburban Character Areas are recommended to include residential uses at densities of up to three (3) units per acre and non-residential densities of .2 Floor/Area Ratio (FAR). Manchester Highway is also labeled as an Urban Arterial. East Gum Road is not identified as a special corridor by the Comprehensive Plan.

Proposal supported by Comprehensive Plan

Staff feels that the proposal is consistent with the policies listed in the Comprehensive Plan.

Infrastructure

Roads: The property is located along Manchester Highway. The closest traffic count to the subject property is located approximately one half of a

mile to the southeast of the property and shows a 2013 count of 3,798 trips per day. Manchester Highway is shown on the County's Long Range Transportation Plan (LRTP) as being widened to a 3-lane cross section in the future. There is approximately 80 feet of existing right-of-way along Manchester Pike, which should be sufficient for this improvement.

East Gum Road is classified as a collector road and is shown to have safety improvements on the County's LRTP. Any needed improvements will be determined at the site plan stage should this application be approved.

Utilities: According to Consolidated Utility District (CUD), there is an 8-inch water line to service the property along Manchester Highway and a 4-inch water line along East Gum Road (See attached map).

Fire Protection: According to information provided by CUD, there is a fire hydrant located at the intersection of East Gum Road and Manchester Highway. Any development will be required to adhere to the adopted fire codes for Rutherford County.

Stormwater: No portion of the subject property is impacted by the 100-year floodplain, as delineated by the Federal Emergency Management Agency (FEMA). The applicant will need to work closely with Engineering Staff to ensure that a stormwater management system is designed to provide water quality and quantity control for any new improvements.

Schools: Not Applicable since this application is not for residential uses.

Background/Proposal Details

Proposed Use: This application comes as a result of a zoning enforcement action on the property. The applicant purchased the property in August 2014 and began operation of his electrical contracting business in November 2014. No zoning approvals were granted for this use. Staff met with the applicant and explained his options moving forward. He decided to pursue rezoning of the property.

The applicant operates an electrical contracting business on the property. Normal operating hours are Monday through Friday from 6:30 AM to 4:30 PM, with some occasional work on Saturdays. The business employs approximately 25 people and there are approximately 12 vehicles, which include bucket trucks, vans, etc. Although there is an office on the property, traffic from the general public is very limited. Most of the area of the existing building is used for storage of materials. The applicant's house is also located on the property but is not part of the rezoning request.

The applicant understands that if the property is rezoned an engineered site plan will be required that demonstrates conformance to the County's regulations.

Access & Parking: The applicant has submitted a concept plan, which has been included with your agenda materials. Access is shown via an existing driveway that accesses East Gum Road. Staff has informed the applicant that improvements will need to be made to the access drive, as well as the entrance to East Gum Road. That being said, there is an existing horse barn that is still used for that purpose on the property. Staff is willing to work with the applicant to provide an access that is sufficient for the business on the property, but still provides a suitable surface for equine use. Most of the traffic on the site will be business vehicles, as public traffic is very limited. Staff does not expect any access onto Manchester Pike.

Landscaping: The applicant's concept plan shows a Type 2 Buffer on the perimeter of the area being requested for rezoning. Buffering will be required to the south, as well. There is very little space between the eastern property line and the existing access drive. Staff has informed the applicant that they will have to propose an alternate landscape scheme along this boundary at the site plan stage if this rezoning is approved.

Performance Standards: Section 1106 of the Zoning Ordinance creates performance standards for noise, dust, odor and hazardous materials that commercial or industrial activities must be able to meet.

Staff/Planning Commission Recommendation

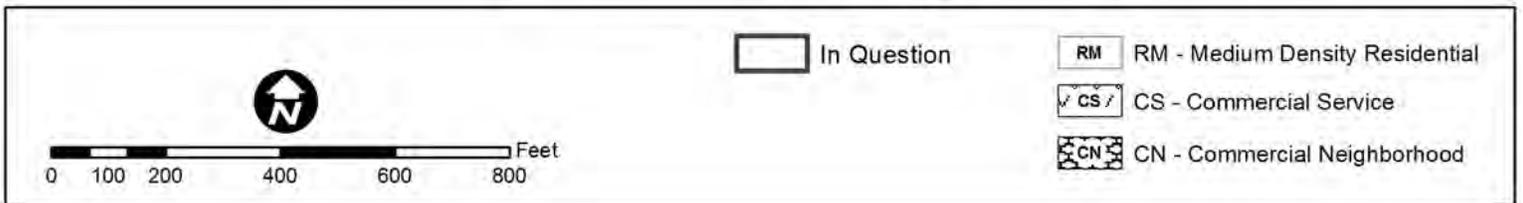

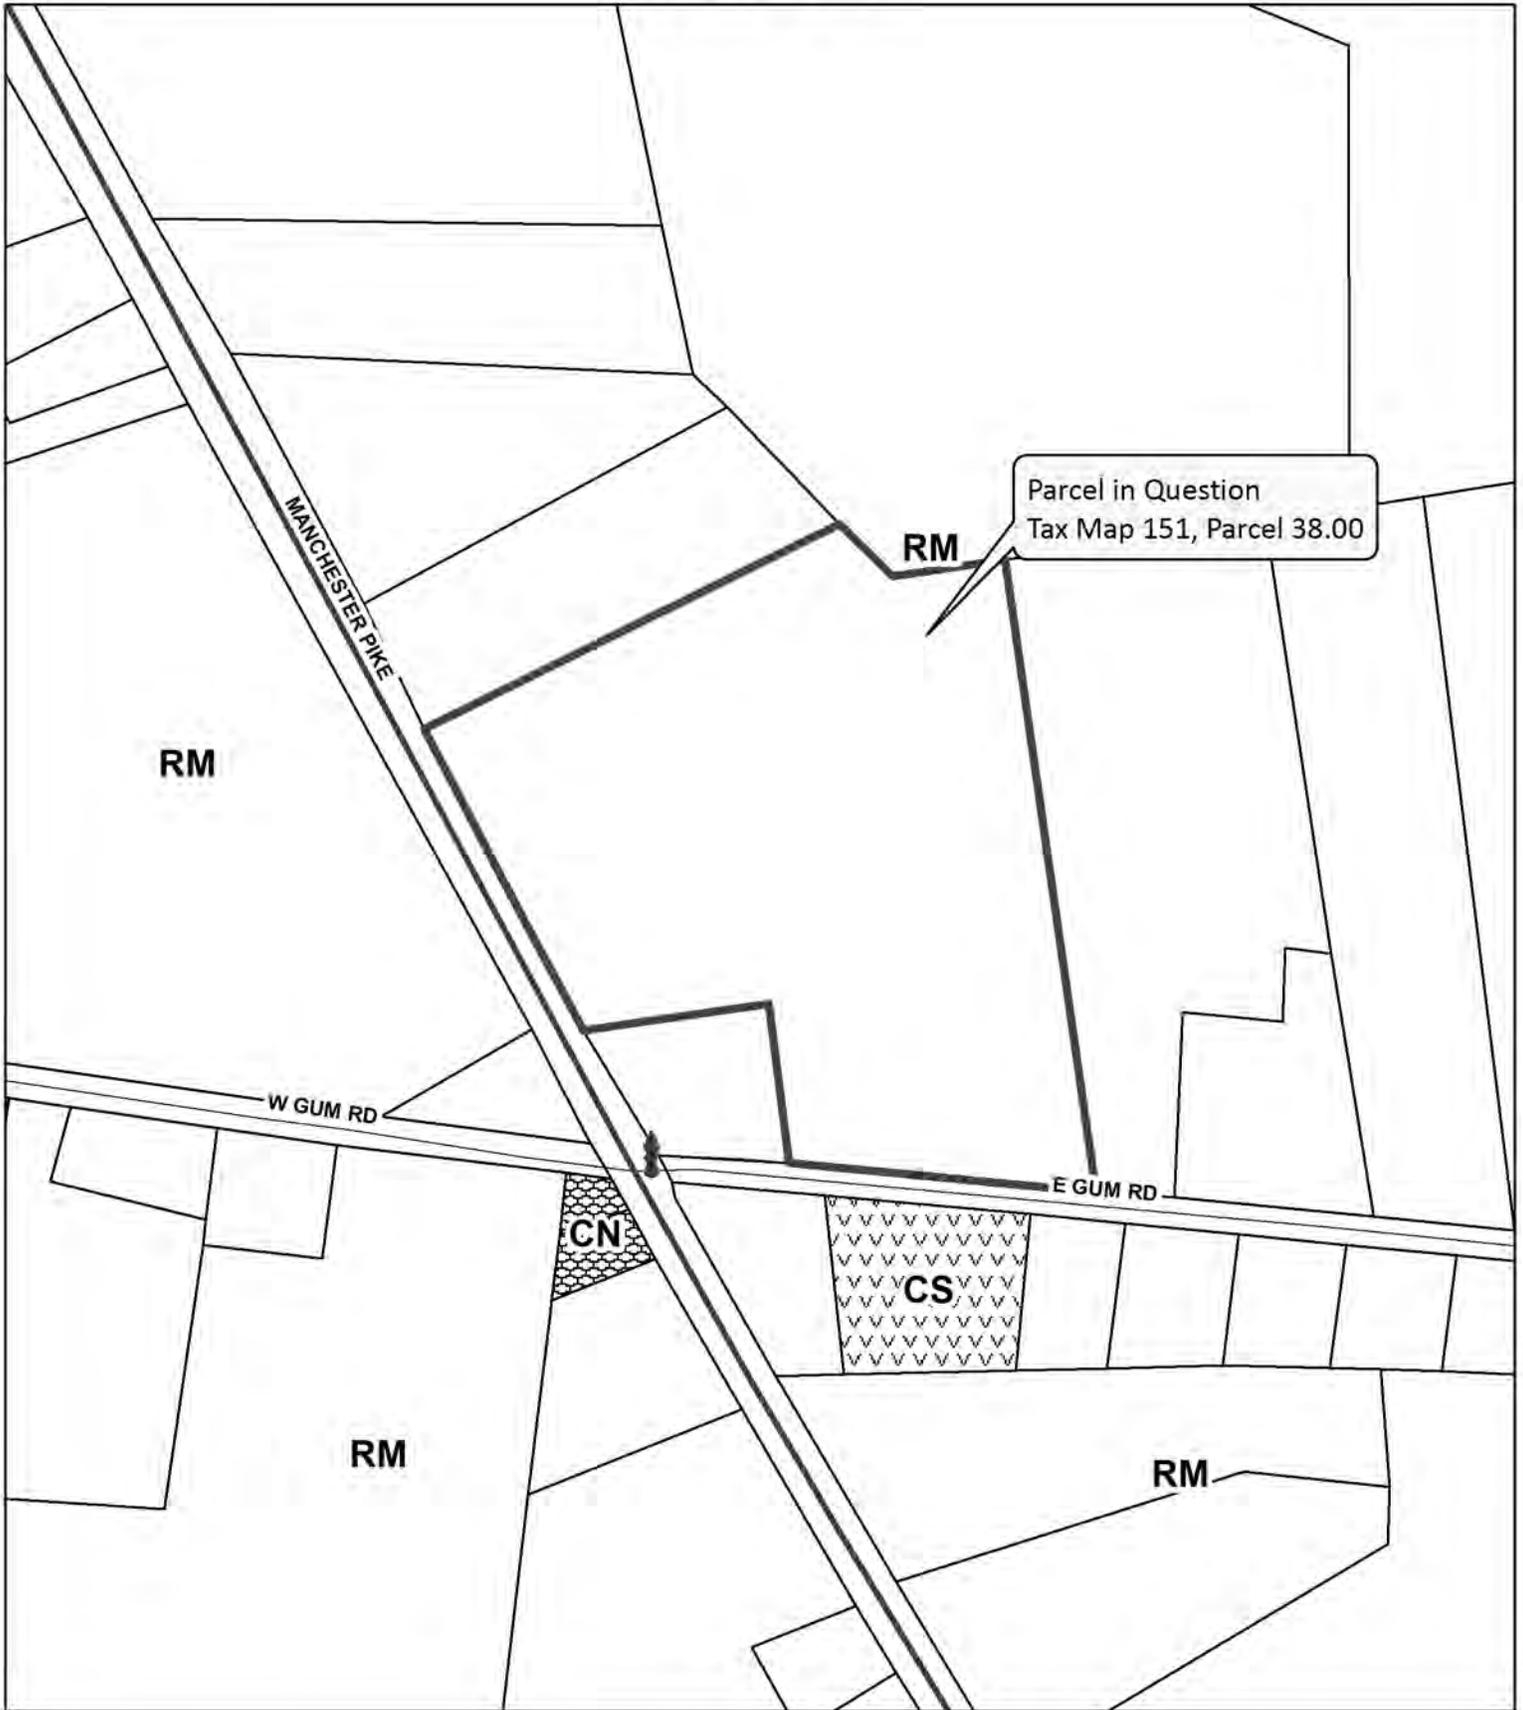

Staff is of the opinion that if this rezoning is approved, the improvements that will be required will make the use compatible with the area. It is located directly across the street from an existing commercial use (mini-warehouses) and has frontage along Manchester Highway, which is labeled as an Urban Arterial by the Comprehensive Plan. Staff recommends approval.

The Planning Commission had some questions about the amount of area requested for rezoning, but ultimately recommended approval of the request by a unanimous vote.
